Welcome to WAVE

WAVE (Wellness, Applied Research and Visionary Education) is an onsite group of clinics spanning nearly 40,000 square feet of space where students from George Brown Polytechnic's Health Sciences programs provide health and wellness services including dental and hearing assessments, under the supervision of qualified health care professionals.

Located in a state-of-the-art, ecofriendly building on Toronto's waterfront, WAVE offers a wide range of economical services for clients of all ages.

Anyone attending the Clinics must have a confirmed appointment and must pass a Health Pre-Screening process.

Denturism clients must pay their accounts in full before receiving their completed dentures. Full or partial payments will be processed the day of the appointment at check-in.

Payment options include Visa, Mastercard, Amex and debit card. We accept the Canadian Dental Care Plan (CDCP), Ontario Disability Support Program (ODSP), and Healthy Smiles, and provide claims for private dental insurance. Fees are in effect as of September 2026. Fees and services are subject to change.

PLEASE NOTE:

Examinations are required for all services. George Brown Polytechnic accepts clients to the clinical facilities based on their suitability for teaching purposes and reserves the right to refuse any client deemed not suitable. We try our best to match your availability with a scheduled clinic. If you become a client of the WAVE Dental Clinic, appointments will be scheduled on the days and times that the assigned student is available. As our students are developing their oral health skills, complete treatments typically require between four to five appointments, and sometimes more. Dentures typically require six to nine appointments. Once you register with us, you will be assigned to a student.

To ensure clear and accurate communication regarding your treatment, clients who are more comfortable communicating in a language other than English are asked to bring a family member or friend to each appointment to assist with interpretation and translation as needed. This helps ensure that treatment information, instructions, and consent are fully understood.
