

# How do I switch between New Content Experience (NCE) and Classic experience?

**PLEASE NOTE** the dates for availability of the toggle and default settings.

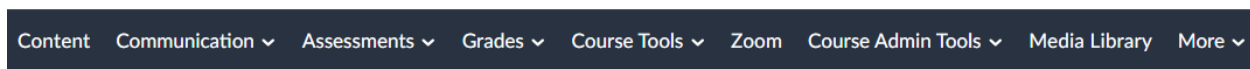

- **Fall 2025:** The ability to toggle between the New Content Experience and the Classic Experience will be available with classic as the default for September 2025. (Rest assured that there will be no change to your courses in the Fall 2025 semester).
- **Winter 2026:** NCE default with ability to toggle between NCE and classic.
- **Spring 2026:** NCE default. Classic toggle no longer available.

A toggle switch is available in the Content section of your course that allows you to choose when to turn on or off the new content experience.

The toggle, represented by a tab with a chevron, is located below the More button on the navigation bar.

When you select the tab with the chevron, you will be given an option to turn on NCE or leave it off.

## A new Content Experience is available!

The new experience is **off**.

Turning on the new content experience will change your students' view of content as well as your own. You can return to the old content experience at any time.

Watch our [tutorials](#) or read our [help documentation](#) to get started!

Turn it on

Leave it off

When in NCE, you can switch back to Classic by choosing the Turn it off button.
