The Gemmology program teaches you to analyze and classify a wide variety of gem materials, both natural and artificially created. The program focuses on analyzing chemical and physical characteristics of gem and gem-like materials, and identifying different gems. The gem materials are classified into categories according to their desirable characteristics, which eventually determine the value of the gems. To accomplish the identification and classification, you use a number of specially designed instruments, such as microscopes, spectroscopes, refractometers and polariscopes, on real gem materials.

Visual acuity and accurate colour rendition are essential traits for success in Gemmology.

Refractive Index liquid (RI liquid), which contains diiodomethane, is a commonly used chemical in Gemmology practice. If you are pregnant, have certain medical conditions or are sensitive to RI liquid, please consult with your physician for advice before you attend this program, as you will be exposed to RI liquid in Gemmology lab work.

THE INDUSTRY

The Gemmology industry works in partnership in a number of sectors including:

- retail trade
- repair
- wholesale
- jewellery manufacturing
- mining
- appraisal
- auction houses
- scientific

**PROGRAM STANDARDS AND LEARNING OUTCOMES**

The graduate has reliably demonstrated the ability to:

1. Identify a large number of gemstones and gem materials and distinguish them from synthetics and imitations.
2. Use, maintain and handle gemmological instruments and testing equipment competently and safely.
3. Grade gemstones for quality based on their cut, colour and other physical characteristics, chemical composition and possible place of origin.
4. Grade diamonds based on their cut, clarity, colour and carat weight.
5. Apply the basic skills of jewellery appraisal to assess market value.
6. Contextualize jewellery according to historical and stylistic qualities to assess provenance, materials and method of production.
7. Conduct ethical and secure business practices consistent with jewellery business standards.

YOUR CAREER

Graduates of this program find employment in jewellery enterprises at manufacturing, wholesale and retail levels. With additional training and experience in the jewellery industry, some become jewellery appraisers. Many graduates, with additional study, write the Canadian Gemmological Association professional exams and the British Gemmological Association exams to obtain internationally recognized professional designations.

FUTURE STUDY OPTIONS

Some credits may be considered for transfer to other Jewellery programs. Graduates with both Jewellery and Gemmology education have a significant advantage in the workplace.

EDUCATIONAL/DEGREE PATHWAY

Opportunities to receive transfer credits toward further study to attain a degree in Jewellery and Gemmology are available.

ADMISSION REQUIREMENTS

Applicants are selected on the basis of their academic achievement, including the required courses, and any other selection criteria outlined below.

- Ontario Secondary School Diploma or equivalent**
- Grade 12 English (C or U)

Basic computer literacy and skill level in Word and Excel are recommended.

** MATURE STUDENT STATUS (19 YEARS OF AGE OR OLDER AND NO OSSD)

Mature Students may take the Admissions Assessment for English3, OR may consider upgrading to achieve the credit(s) needed in English4.

Please note that George Brown is committed to ensuring that applicants will succeed in their program of choice. Meeting the minimum requirements does not guarantee admission to the program. Applicants may be required to have grades higher than the minimum requirements stated.

COURSE EXEMPTIONS

College or university credits may qualify you for course exemptions. Please visit georgebrown.ca/transferguide for more information.

INTERNATIONAL STUDENTS

Visit the International Admissions5 page for more information.

SPECIAL REQUIREMENTS

Visual acuity and accurate colour rendition are essential traits for success in Gemmology.

CHEMICAL SAFETY DISCLOSURE

The Occupational Safety and Health Administration (OSHA) recommends the use of good laboratory practices while using or being exposed to refractive index (RI) liquid, which contains diiodomethane. You will use RI liquid when using a refractometer, which you will come in contact with directly or indirectly in various courses. You may need to exercise special precautions if you are pregnant, if you have certain medical conditions, and if you have sensitivity to, or are allergic to, this chemical. If you are unsure, contact your physician for advice.

"The George Brown College Gemmology program gave me the skills I needed to succeed in the ever-changing field of jewellery, diamonds, and gemstones. While helping to develop the technical skills required to work and succeed in this field, the faculty also helped me to develop meaningful connections with those already working in the industry. The networking skills learned at George Brown College have proven invaluable to me in my career thus far."

Michael Vander Eyken, FCGmA (Graduate 2016, Gemmology); Diamond & Jewellery Consultant, Kimberfire Inc.

VISIT OUR CAMPUS

Our Jewellery programs are part of our School of Fashion & Jewellery and classes take place at our Casa Loma Campus, located at 160 Kendal Ave, Toronto, ON, Canada.

On-campus information sessions are available. Come and have your questions answered. Learn about the program content and career options, meet your friendly professors and staff, and experience what it is like to be in a George Brown College classroom. Sign up for an upcoming session.

Campus tours are offered on a regular basis. Sign up today! You can also check out our virtual tour.
